PROJECTS

Manas Health. A MERN stack-based web application designed to assess the mental health of school students. Students complete quizzes on stress, depression, and anxiety, and an integrated ML model evaluates their mental condition (Normal, Mild, Severe, or Extremely Severe). Teachers can log in to view comprehensive student reports, enabling them to provide personalized guidance and support. The project emphasizes user-centric design, scalable architecture, and data-driven insights. (Github link)

Feedback Analysis A MERN stack-based web application integrated with Deep Learning to provide a comprehensive analysis of product reviews. Users can paste a product link from Amazon or Flipkart, and the platform generates a concise summary of user reviews, sentiment scores, and detailed pros and cons of the product. This tool helps buyers make informed decisions before purchasing and enables sellers to understand public reception and improve their products. The project emphasizes user-friendly interfaces, efficient review analysis, and actionable insights. (Github link)
